Data Entry Officer - Data #3, Brisbane

Drake International-Recruitment

Data#3 Limited (DTL) helps customers navigate the ever-changing tech landscape and embrace the human-technology connection. With proven experience and cutting-edge tools, DTL empowers customers to thrive in the future.

Responsibilities

- Utilize Microsoft Dynamics 365 to efficiently record and categorize data from purchase orders for computer and IT equipment from various educational institutions and government bodies within Queensland.
- Maintain data accuracy and consistency: Verify all information entered is accurate and complete, adhering to established data entry protocols.
- Classify and categorize data: Assign appropriate categories and tags to each entry, ensuring efficient organization and retrieval of information in the future.
- Monitor data quality: Regularly review and analyse entered data to identify and rectify any discrepancies or errors, maintaining the overall integrity of the database.
- Collaborating with colleagues to streamline processes and contribute to industry best practices.

2019 – 2022

Head Cook

Guzmán y Gómez – Brisbane.

Australian multinational casual-dining and fast food restaurant chain. It specialises in Mexican cuisine with burritos, nachos, tacos, quesadillas and other Mexican-inspired items available.

- **Preparing and cooking food:** This is the most essential responsibility of a cook. They follow recipes to prepare ingredients, cook dishes to perfection, and ensure they meet quality standards for taste and presentation.
- **Food prep:** A lot of work goes into getting ready to cook! Cooks are responsible for prepping ingredients beforehand. This might involve washing, chopping, and measuring ingredients, making sauces, and getting everything ready for the main cooking stage.
- **Maintaining a clean and safe kitchen:** Keeping the kitchen clean and sanitary is crucial. Cooks are responsible for cleaning their work areas, following food safety protocols, and ensuring a hygienic environment for food preparation.

2015 – 2019

Technical Support and Help Desk.

SYC S.A – Colombia.

Systems and Computers S.A. is an innovative engineering firm offering outsourced IT services. Their data and information management solutions leverage a blend of expertise, resulting in custom computer solutions that empower their clients.

Responsibilities

- Empowering clients through remote and on-site technical assistance using tools like TeamViewer, VNC and Remote Desktop.
- Resolve customer technical challenges quickly and efficiently using the ticket system developed by the company and via email.
- Diagnosis and resolution of technical problems in hardware such as printers and peripherals, as well as user control, passwords and permissions to guarantee an optimal customer experience.
- Developing and maintaining clear, up-to-date technical documentation.
- Building rapport with clients through clear, professional, and friendly communication across all channels.
- Providing exceptional client service through written and verbal communication.
- Collaborating with colleagues to streamline processes and contribute to industry best practices.
